

Audio/Visual Requirements and Guidelines

Meeting the following audio visual requirements and guidelines will help to ensure a great presentation. Please have available the following equipment:

- Wireless lavalier microphone
- White Board
- Full house lights (if using image magnification and/or video taping, please use as much house light as possible)

Room Setup

The following suggestions are important not just for the effectiveness of Janna's presentation, but for the overall success of the event:

- The ideal distance from the first row of seats/tables to the stage should be no more than 10 feet.
- The ideal stage/riser height for audiences of up to 200 people is 6"-12"; for audiences of more than 200 people, 12"-24" in height is appropriate.
- Screens not being used should be raised during Janna's presentation if possible.

Janna is a high-energy speaker who utilizes movement to connect with her audience. This means that she likes to move from left to right across the stage and occasionally out into the audience. If possible, please take this into consideration when considering stage set and audio logistics.
